

Designed for both day and night work in 70+ km/h zones, the T-RV-3-28 traffic cone is a recommended visual cue for short-term work in urban areas, very short and short-term work, and road marking operations during the day, in lighted tunnels or at night. The 711,2 mm (28") high cone is made of flexible, impact-resistant PVC in fluorescent orange for visibility. Compliant with the M.T.Q. T-RV-3 standard, the T-RV-3-28 is equipped with two circular strips of "High Intensity" Grade (type IV) white reflective sheeting for added visibility. Although it can be used in zones of more than 70 km/h, the T-RV-3-28 traffic cone must not be used on the highway network, except in certain specific cases.

- Includes a handle for easy handling
- Reinforced base for more rigidity
- Flexible PVC to resist impacts

Technical Informations

Product N°:	T-RV-3-28
Dimensions	
Height:	711,2 mm (28")
Width:	342,9 mm (13,5")
Weight:	4,54 kg (10 lbs.)
Materials	
Cone:	PVC with UV protection
White Sheeting:	High Intensity Grade – Type IV
Available Colours:	
Cone:	Orange, Yellow-green
Sheeting:	White
Stabilizer:	Black
